JOHN ROVIC LALUSIN

Software Engineer

Experienced in backend development with exposure to web and mobile technologies. Worked in local and international markets across corporate and startup environments. Skilled in building scalable, revenue-generating products with strong technical documentation expertise. Proven ability to excel in high-level competitions, including outperforming college competitors in a national programming contest in 11th grade and competing against Microsoft interns in an IoT hackathon at World Trade Center during the final year of college.
