Position Applied Software Engineer – Full Time (or related field)

Leading a team of young programmer and designers on my first Job at a startup contributes to the development of my skills in the early stage of my career. Years of experience in real world software development will be a fundamental part of my next role. **Native Android App**, **Firebase**, **PHP**, and **MySQL** are the primary technologies I worked within my previous job. On top of that, my internship experience solidify my skills in **Dot Net** and **MSSQL**. I am also ready to learn and adapt new technologies used by the company. I finished two year IT in Mobile App and Web Development at STI Lipa and currently taking the final year of Bachelor of Science in Computer Engineering (BSCpE).
