JOHN ROVIC LALUSIN

Software Engineer

Initiating a professional career at the age of 18, I assumed a leadership role within a startup in 2019. My abilities and skills have been further honed through my current full-time position at a Japanese outsourcing firm. Prior to these roles, at 17 while in the 11th grade, I showcased exceptional abilities by surpassing college-level participants in a national programming competition. Additionally, I engaged in an IoT hackathon, competing against Microsoft interns, all before completing my college degree.

WORK EXPERIENCE

SOFTWARE ENGINEER

2023 - Present
MARCH

HiPE Japan Inc.

Azure, Dart, Docker, Flask, Flutter, Java, JavaScript, jQuery, Laravel, MySQL, Oracle DB, PHP, PostgreSQL, Python, Redis, React, Ruby, Ruby on Rails, SQL, Struts, Vue

- Collaborate with Filipino and Japanese developers to deliver web-based systems for Japanese businesses, focusing primarily on backend development.

IT SOFTWARE INTERN

2022

ARC System Solutions Co.
